

**COOK**  
MEDICAL

**CXI™**  
SUPPORT CATHETER

Braided  
Technology

Tip  
Options

Reach and cross lesions  
with the true peripheral support catheter.

**DEPENDABLE TRACKABILITY**

Low profile from tip to hub ensures smooth transition through small vessels. Shaft's polymer material offers desired flexibility.

**EXCEPTIONAL PUSHABILITY**

Braided stainless steel construction along entire length provides superior pushability. Hydrophilic coating eases your way through tortuous anatomy.

**ENHANCED VISIBILITY**

Embedded radiopaque bands allow you to size the vessel segment length. Depth markers clearly show progression into the sheath.

# CXI™

## SUPPORT CATHETER

### ADDITIONAL FEATURES

Cook's superior-tip tapering process results in a seamless transition from catheter to wire guide.

Low-profile straight tips provide exceptional pushability, and unique low-profile curved tips facilitate access of superselective anatomy. The distal 40 cm portion has hydrophilic coating for ease of insertion.

The low-friction lumen enhances exchangeability, and radiopaque bands at the tip and at 5, 10 and 15 cm provide enhanced visibility.

### COMPLEMENTARY PRODUCTS

#### APPROACH® CTO WIRES

A peripheral-specific crossing wire with a shorter taper and wide range of tip loads helps you cross difficult lesions.

Order Number	Reference Part Number	Fr	Accepts Wire Guide Diameter inch	Length cm	Tip Configuration
G18367	CXI-2.6-18-65-P-NS-0	2.6	.018	65	straight
